

J-PLUGALARM

A mini but mighty high security solution for retailers.

HIGH SECURITY IN A COMPACT PACKAGE

The patented 3.5mm audio locking mechanism provides maximum security (538LB pulling force), without having to use a heavy/bulky claw system. While the alarm cable provides support for charging and siren.

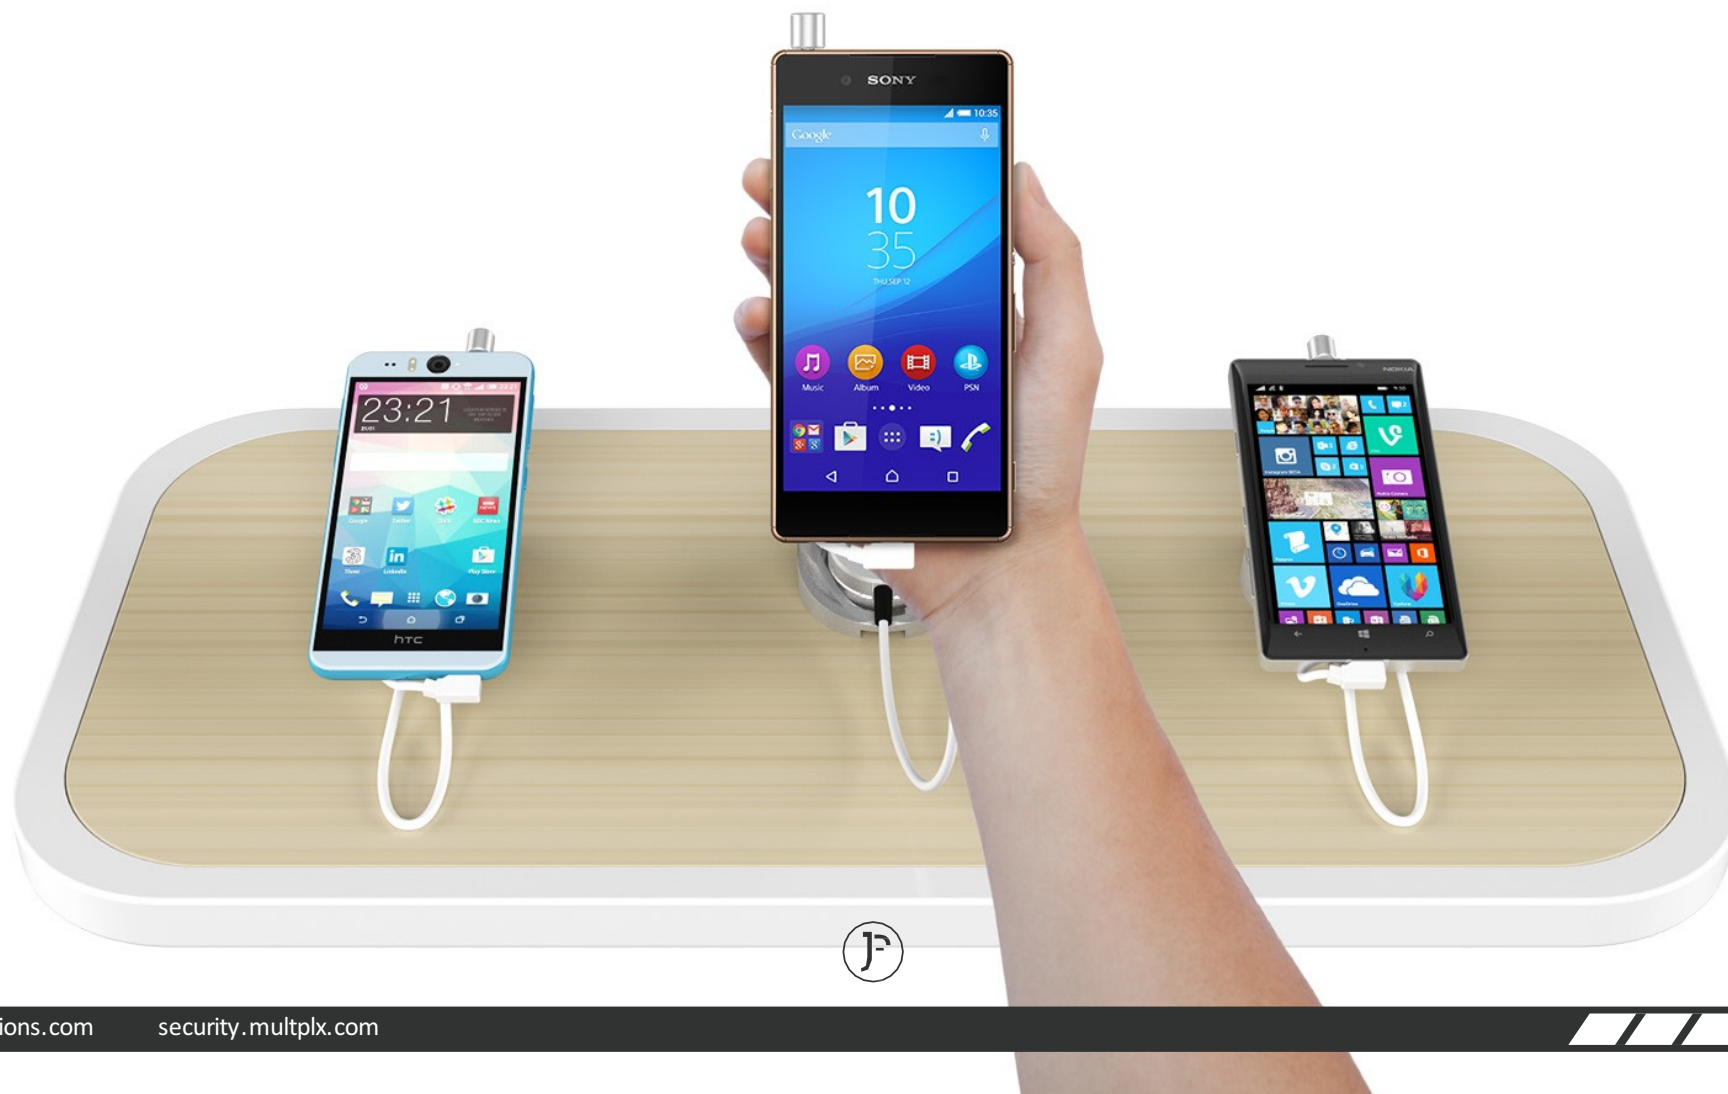

STOP CUT & RUN. STOP GRAB & RUN

Equipped with an aircraft grade steel cable, capable of handling “Cut and run” threats in excess of 494LB. Protected from “Grab and Run” situations with a pulling force resistance in excess of 200LB. The “Trip Wire” technology in the cable triggers the piercing 100db siren the moment an attempted theft is taking place, allowing staff to react quickly to the situation.

GREAT IN HAND EXPERIENCE

Feel the "True weight" of the device. No heavy security retention or feeling of bulky security attachments.

ONE SOLUTION TO STOCK, TRAIN AND FIT

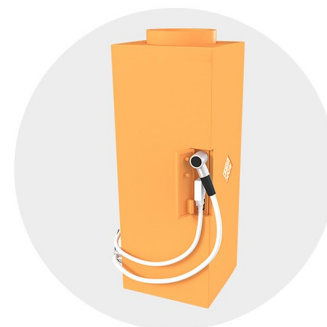

Simple to install and operate. Easy for staff to merchandise. AutoArm/ Dis-Arm.
No traditional key system required.
